

HYDROQUIP™

THE **SMART CHOICE**™

DUAL INTERFACE INSTRUCTIONS

Connect (2) Spaside Controls
to any Standard, Deluxe or
Ultimate Series Spa Controls System

CONNECTION

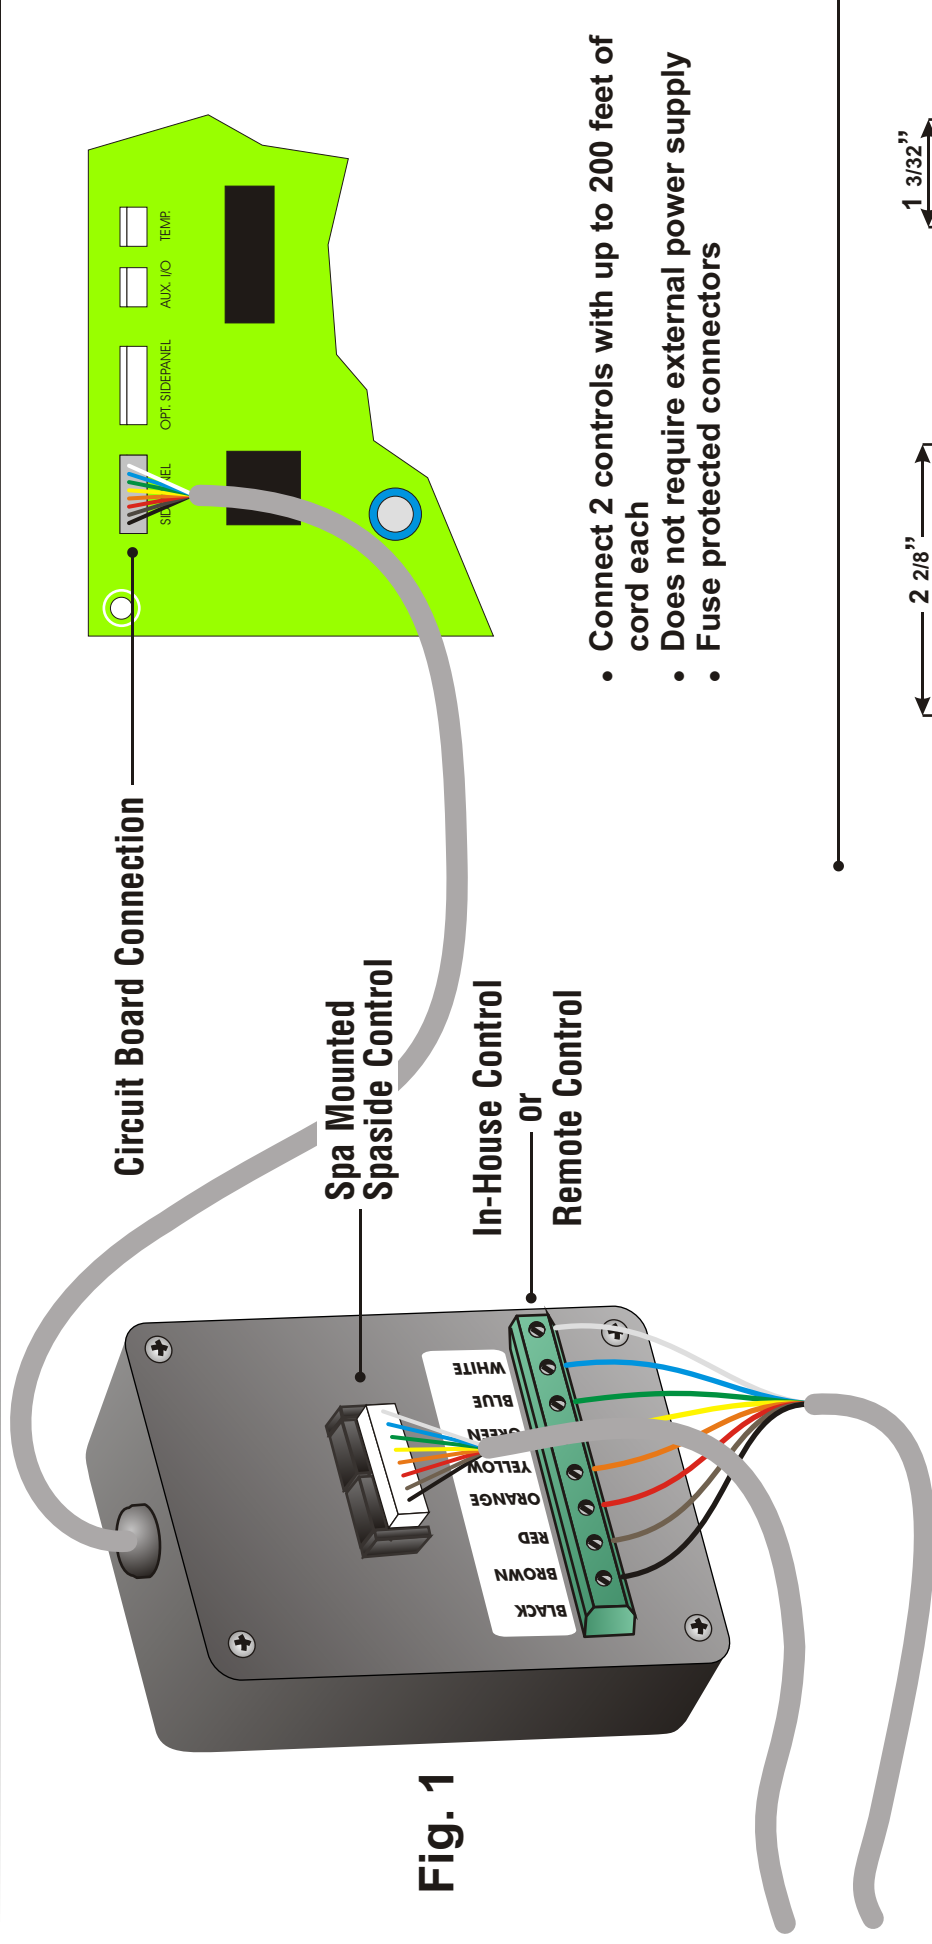

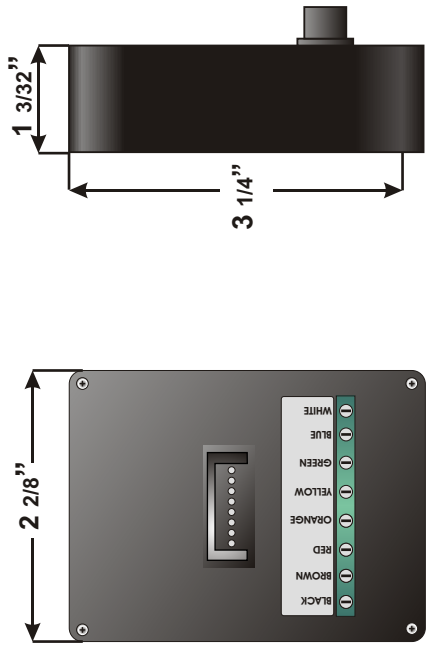

Fig. 1

- Connect 2 controls with up to 200 feet of cord each
- Does not require external power supply
- Fuse protected connectors

CONNECTION:

- 1 Position and attach Dual Spaside Interface using the double-sided tape on back of box.
- 2 Connect interface cord (top of box) to Spaside connection on printed circuit board.
- 3 Connect the spa mounted spaside control to the standard connection as shown in Figure 1. (See note on back page)
- 4 Connect the In-House or Remote Control to the terminal block (**wire colors noted on label**) as shown in Figure 1.

Note: The control connected to the standard connection of the Dual Interface (Spa Mounted) will be recognized as the primary control if for any reason a key on the secondary (In-House or Remote) and primary are pressed simultaneously.
